| 1 Background of the application | 5 Background colour of the navigation bar |
| 2 Background colour of the content | 6 Logo of the application |
| 3 Font and icon colour of the content | 7 Highlight colour |
| 4 Submenu | 8 Icons and texts in the navigation bar |

1 Background of the application:

A dark and a light pattern is available for the background of the application. Alternatively, the background can also be coloured in monochrome black or white.

2 Background colour of the content:

The background colour of the content can be either black or white. Make sure to choose a colour with high contrast to the font and icon colour (see 3).

3 Font and icon colour of the content:

The font and icon colour of the content can be either black or white. Make sure to choose a colour with high contrast to the background colour of the content (see 2).

4 Submenu:

The background colour of the submenu can be either a dark or a light grey tone. However, please note that texts within the submenue are always displayed in the text colour of the navigation bar (see 8).

5 Background colour of the navigation bar:

For the background colour of the navigation bar, we recommend black, white or a grey tone. With specific colour requests, slight deviations of the colour may occur due to the colour gradient in the background.

6 Logo of the application:

The logo of the application can be customized. For further information, please contact our Service Desk during the clarification of the adjustments.

7 Highlight colour:

The highlight colour is used in various places within the application and highlights particularly important elements. Therefore, a clearly recognizable colour should be chosen (see next slide).

8 Icons and texts in the navigation bar:

The icons and texts in the navigation bar can be either black or white. They should provide a high contrast to the background colour of the navigation bar (see 5).

WissIntra NG

Title ? Title

Colour ? Grey

Responsible ? Please select

Main function ? Please select

Save & Close

The interface features a navigation bar with a home icon and several tool icons. The form fields are outlined in orange, and the 'Save & Close' button is orange. Below the form, there are five orange squares of varying shades.

Colour ? Grey

Responsible ? Please select

Main function ? Please select

Save & Close

The interface features a navigation bar with a home icon and several tool icons. The form fields are outlined in blue, and the 'Save & Close' button is blue. Below the form, there are five blue squares of varying shades.

Highlight colour:

The highlight colour is used in various places within the application and highlights particularly important elements (see preview above). You should therefore choose a colour that is clearly distinguishable from the navigation bar as well as from the content of the application.
